'Activity and Grade Scatter Plot' Report

What can this report do for me?

- This report plots students enrolled in a LearnJCU subject against two variables: the **Grade Centre Final Grade** and one of several **types of student activity** that can be selected.

Handy tip!

The report can be printed or exported using the below icon at the top of the page.

Interpreting and Using the Report

After the report has been run successfully, a plot of students enrolled in the subject is displayed against two variables: the total **Grade** (depending on if you selected SIS Grade or the LearnJCU Grade Centre Grade) and the **Activity Type** selected.

If a student was selected, a larger orange dot is displayed to highlight the selected student.

This report can help visualize the extent to which different types of activity are related to the student's final grade. It can also be useful to find students who are relatively active compared to other students enrolled in their subject, but who are struggling academically.
