## Discover the Master of Philosophy (MPhil)

A Research Masters degree equips graduates with the research skills and discipline strengths necessary to enhance your professional practice or for further study via a PhD.

The Masters of Philosophy gives you:

- An internationally recognised research degree with the opportunity to research an area that fascinates you!
- An alternative to an honours year: You can enter with a Bachelor's degree with either a GPA of 5.5, or with relevant professional or research experience.
- No fees: Domestic candidates are funded under the Federal Government's Research Training Program (RTP); International candidates may apply for fee waivers.
- Professional development: You can develop professional skills within your existing sector, or apply your research, critical thinking, and problem-solving skills to new contexts.
- Feel ready to proceed to a PhD
- All in two years or less of full time study
