

WHY TAKE MATHS METHODS?

ARE YOU PLANNING TO STUDY A UNIVERSITY DEGREE?

Passing Maths Methods as well as you can is your best preparation for doing well at University, even if your degree only has a small amount of maths.

— STUDYING GENERAL MATHS

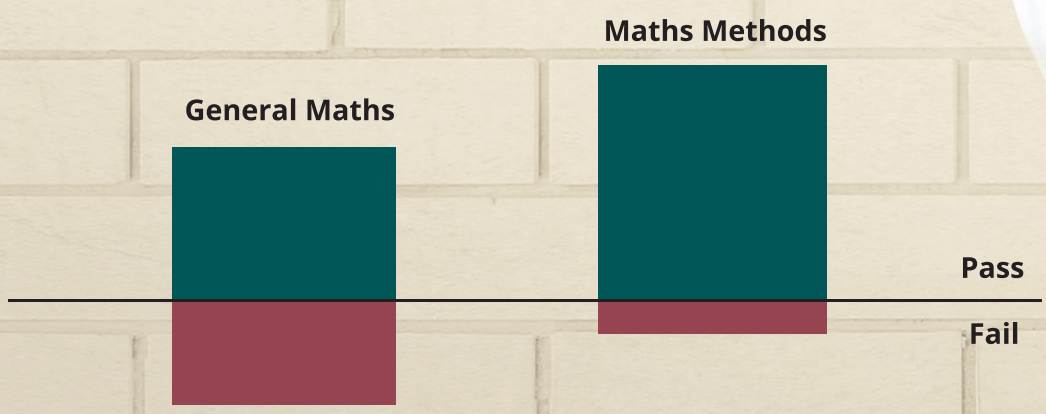

General Maths gets you into some university degrees but you'll find it hard to pass.

Most students who complete General Maths at high school are not well prepared for first year University maths in degrees like **primary, early childhood or secondary teaching**. That means many students with only General Maths do not pass the maths subjects in those degrees on their first attempt.

+ STUDYING MATHS METHODS

You're well prepared to take on University maths if you do well in Maths Methods.

Those students who take Maths Methods are far better prepared for Maths at University. The majority of students who take Maths Methods at high school successfully pass first year maths in degrees like Education.

First year uni maths results in an Education degree
