

Information Technology

Dominique Gregoire - 2022 Mentor Leader

Minor in Computer Science & Networking

CAREER PATH: When I started this IT degree, I had absolutely no idea what I was getting myself into ... However, it has turned out to be a wonderful and interesting journey, where I have learned so much, met and worked with some awesome students, lecturers and entrepreneurs. During the past 2 and half years I have found myself getting quite passionate about cyber security and data analysis. So, it looks like that is where I shall probably end up.

ABOUT ME: I'm a mature (ahem) student who has somehow managed to bring up two very talented and awesome daughters (one of which is a mother of three), completed a nursing degree in 2003, travelled around Australia solo and ended up coming back to uni middle of 2019. I am now about to start my third and final (crossed fingers) year of uni.

FUN FACT: I recently bought myself a PS2 and am replaying the old school games... Shh ... you are now sworn to secrecy!

Matthew Marsh

Minor in Human-Computer Interaction and Games Design

CAREER PATH: When I graduate from the IT course, I plan to either go into the information security sector or use my minor study to get a job designing and creating games in the digital entertainment industry.

ABOUT ME: I've spent most of my life living in Mossman, just north of Cairns, and attending schools there, however I spent a few years living in Townsville as well. I've done previous study in journalism and creative writing, teaching English as a secondary language and a short course in game design. In my spare time, I enjoy working on personal projects whether it's programming or video editing.

FUN FACT: In high school, using DOS, I sent a system wide message to every computer in the school. (And got in big trouble for it.)

Dannielle Jones

Minor in Human-Computer Interaction and Games Design

CAREER PATH: I am interested in moving businesses forward with their technology needs through careers like a Business Analyst or Systems Administrator or being on the edge of where creativity meets technology in either software development or web development.

ABOUT ME: I am currently studying Information Technology but I have also had experiences in Visual Arts, English and Education subjects. My philosophy is to learn as much as you can because you will always be surprised by what is useful when you enter a workplace.

FUN FACT: I have a variety of interests from novel writing, gaming, Visual Arts, Digital Arts, singing/music (love heavy metal!), history, gardening, and psychology.
