

Biomedical Sciences, Clinical Sciences, Medical Laboratory Science

Gabrielle De Weers

Medical Laboratory Science

CAREER PATH: Medlab allows for so many different pathways, however, I'm particularly interested in Microbiology and Histology as I love the hands on process of identification and diagnosis.

ABOUT ME:

FUN FACT: I'm a twin!

Donelle Rianne Dulalia

Biomedical Sciences

CAREER PATH: I applied for Biomedical Sciences as a 'pre-medicine' course, but I developed an interest in research because of this degree! I am hoping to do honours program, apply for medical school after, and then pursue a specialisation in neuroscience.

ABOUT ME: I am born and raised in the Philippines. I also have multiple leadership experiences starting from primary school up to senior high school!

FUN FACT: I speak four languages- including intermediate-level Korean and conversational Japanese! I also know the series 'The Big Bang Theory' by heart!

Taylor Edgley

Biomedical Sciences > Medicine & Surgery

CAREER PATH: After completing my biomed degree last year, I'm thrilled to now be continuing my studies as a first year medical student, and look forward to exploring my love of anatomy further.

ABOUT ME: I was born and raised in Townsville, though most of my extended family lives in Adelaide. In my spare time I like to go to the gym and waste hours on Netflix.

FUN FACT: I didn't finish high school until I was 21, so began uni as a mature aged student.

Sonya Matthews

Medical Laboratory Science

CAREER PATH: After having my children, I decided a career change was needed. JCU careers advisors guided me towards Medical Laboratory Science where I could fulfil my interests in the clinical aspects and the human body.

ABOUT ME: I am originally from Newcastle in NSW. My home is now Townsville where I have been for the past 9 years with my Husband and our two beautiful boys.

FUN FACT: I absolutely love plants and gardens but somehow, I am terrible at it and almost always end up killing the plants!

Andrea McKeough - 2022 Mentor Leader

Medical Laboratory Science

CAREER PATH: I've been passionate about my future as a Medical Laboratory Scientist since day one, and hope to use the knowledge and skills I've gained at JCU to make a real difference as a multi-disciplinary scientist! Throughout my degree, I've developed a keen interest in Immunology and Microbiology, and have particularly enjoyed learning about Anatomy and Infectious Disease.

ABOUT ME: I'm half Thai and half Australian, and come from a tiny mining town in the NT. I enjoy spending time in nature, binging anime/TV shows, and making Spotify playlists.

FUN FACT: I also love to draw! Helps a lot when studying anatomy.
