JAMES COOK UNIVERSITY AUSTRALIA

USER GUIDE

'Activity Matrix' Report
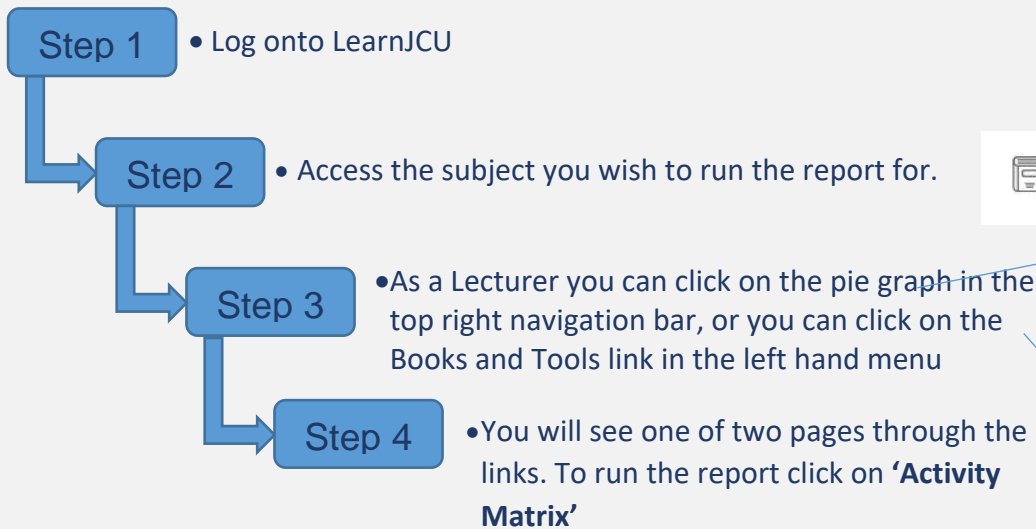

What can this report do for me?

- This report displays a grid of students enrolled in the subject and various decile and heat map information against two variables: the **Grade Centre External Grade** and **Interactions**.

- This report might be useful to find students who fit certain activity and performance profiles, which can then be used to inform a differentiated educational approach.

Running the Report

Step 1 • Log onto LearnJCU

Step 2 • Access the subject you wish to run the report for.

Step 3 • As a Lecturer you can click on the pie graph in the top right navigation bar, or you can click on the Books and Tools link in the left hand menu

Step 4 • You will see one of two pages through the links. To run the report click on **'Activity Matrix'**

Details & Actions

- **Class register** — View everyone on your subject
- **Course Groups** — Create and manage groups
- **Subject is open** — Students can access this subject
- **Subject Room** — Join session
- **Attendance** — Mark attendance
- **Announcements** — 3 Posted | 3 Total
- **Books & Tools** — View course & institution tools
- **Question Banks** — Manage banks
- **Student Preview** — Enter student preview mode

Interpreting and Using the Report

After the report is run successfully, the data is displayed for each student in aggregate, and over time, for the respective Study Period. The relative comparison between students enrolled in the subject is accomplished using statistical deciles, which divides the activity and grade data into 10 equal parts, the results of which are displayed graphically using a heat map colour scheme.

The decile values for the Activity and Grade for a given student are from 1-10. Each of these values is assigned a heat map colour, from blue (highest, or 1st decile) to red (lowest, or 10th decile).

Below is the definition for each column heading within the matrix.

- **Student:** The name of the student, including the student jc login ID.
- **Interactions:** The interactions decile value for a given student (1-10) displayed as a heat map. Moving the cursor over a given student's decile heat map will display the decile value and the measure details.
- **Grade:** The Grade Centre External Grade decile value for a given student (1-10) displayed as a heat map. Moving the cursor over a given student's decile heat map will display the decile value and the measure details.
- **Matrix:** Each student is assigned a "matrix" classification based on their relative activity and grade decile values, which provides a generalisation of a student's activity and grade profile in a subject. Moving the cursor over a given student's matrix category will display the category classification, and the activity and grade deciles. Each student is assigned a matrix category as follows:

Matrix Category	Icon	Activity Deciles	Grade Deciles
Active & Higher Grade		1, 2, 3, 4, 5	1, 2, 3, 4, 5
Inactive & Higher Grade		6, 7, 8, 9, 10	1, 2, 3, 4, 5
Active & Lower Grade		1, 2, 3, 4, 5	6, 7, 8, 9, 10
Inactive & Lower Grade		6, 7, 8, 9, 10	6, 7, 8, 9, 10

- **Interactions by Week of Study Period:** The decile value for a given student (1-10) displayed as a heat map for each week of the respective Study Period. Moving the cursor over a given student's decile heat map will display the decile value and the measure details.

Activity and Grade Matrix

Report Help

This report displays grade centre and interaction data on a relative basis for students enrolled in a LearnJCU Subject. The data is displayed for each student in aggregate, and over time, for the respective study period.
