Majors

Depending on your chosen career path, you can complete a thesis, customise your degree by choosing four elective subjects, or select one of three majors.

Conflict Management and Resolution

Develop your expertise to become an effective leader in the face of change, uncertainty and conflict. Learn how to constructively manage complex conflict, and work with conflict management systems. Students analyse a diverse range of conflict situations through practical, skills-based learning in subjects such as negotiation, facilitation, cross-cultural conflict resolution, conflict coaching and mediation.

Economics

Build your economic analysis toolkit with a focus on environmental and resource economics. Students study core subjects and choose one elective to gain insight into how environmental, resource, and growth decisions impact national and international economic policy.

Leadership

Grow your knowledge and skills to become a mindful global leader of the future. You will complete core subjects that examine strategic decision making and develop your expertise in creating value, managing change, and working within culturally diverse organisations. Choose an elective to complement your chosen career path.

“The Master of Governance and Leadership provides students with opportunities to build their knowledge and skills across two important areas: governance and leadership. It seeks to develop Business Leaders who understand complex societal issues and have the expertise to address these issues in collaborative, integrated and inclusive ways that creates value for all stakeholders. This program connects students with experts in the classroom and leaders from industry. Through the advantages of small classes and collaboration with peers, and combined with opportunities for immersion into practical, experiential learning, this program prepares graduates to become future mindful business leaders who are focused on improving the public good.”
