Overview

Blackboard Analytics for Learn classifies items in LearnJCU subject sites as Content, Tools or Assessment items. These classifications assist in understanding and analysing site design within and across subjects, and across the university. Items are listed under relevant classifications below.

The Content Collection is a file repository with several sophisticated features for working with content. The Content Collection provides repositories for Blackboard Learn courses and users, and is managed through the Administrator Panel. It also allows users to store, share, and publish content within folders.
